About This Game

Fly your spaceship from wormhole to wormhole, navigating dangerous space station obstacle courses and collecting crystals from the wreckage of fallen enemies. The Crystal Nebula demands your highest dexterity and accuracy in order to shoot and dodge your way through its waves of opposition! Prepare to take room-scale to its fullest as you steer your ship from bound to bound, traversing the many traps of the derelict space stations and flourishing to avoid enemy fire. Demonstrate your resolve with online leaderboards and special prizes for top fighters!

Title: The Crystal Nebula

This DLC is great!! Now we just need more tracks.. An in depth management simulation of the wrestling world. It takes you completely backstage of all the things that takes place behind the scenes of the real world. You can pretty much take an idea and put it to paper, but you'll soon find that the idea is either not worth it or it simply worked out for you. You have to understand every wrestler you have with a gimmick, their salary, the scheduling (whether you book them in a show too many times or not enough), learn how to build the momentum of a worker or to completely destroy their entire career, you can customize absolutely everything, and you can fall in love with the in depth micro managing side of things. The best part of this game, is that the modding community is mind blowing, from fantasy creations to updated real world mods. Currently, this modding community is somewhat lackluster since TEW16 has been out (which I own), but sadly it isn't on Steam, which it really should be. I go back and forth, as TEW13 has a better design layout in my opinion, but TEW16 is less buggy and has more features that makes a difference between the two.

If you love management games, spending hours upon hours customizing, and love wrestling, this is the game you NEED.. It's sad when the only good part about a game are the trading cards. Except that, the game is pure garbage, it looks unfinished.. Awesome! Thanks!. Entertaining game with simple strategy elements.

I normally don't play card based or strategy games, but I really enjoyed this one. Great for relaxing with a cute, little story.. Nice puzzle game based on logical connective and boolean algebra.. old and gold :). Lack of VOLUME CONTROL ruins the game. Having to hear the music blasting full volume constantly is lazy software development.. **IF YOU PLAY BUY THIS FOR DISCOUNT, YOU CUUUUNNNNNNTTTTTTTT!!!!!!
BUY THIS OR RIOT!!!**

SAVE ALL CUTE CATGIRLS, DON'T WAIT A DISCOUNT TO SAVE ALL CUTE CATGIRLS!!!!!!. yes i recommend this game but make sure you play in the same room, it was confusing to start up. and make sure you use regular mode NOT custom because its more fun with regular mode until you know how custom works. So all you gotta do is get a group of people together in same room so everyone can see the pictures and stuff on the laptop, only you buy the game and they all connect on their phone while you have one laptop as host playing. Make sure your the first one to join so that you are host. Overall fun party game though, not many out there. Recommended. Me and my friends couldnt find a way to play online maybe they could see it if they are an "audience member" on a different device not sure.

I wasn't sure what to think of this game walking into it. I wanted a game to play before I took a nap and was honestly hoping for something that would put me to sleep.

This was not the case.

PestoForce did a good job of taking everything enjoyable about some of the older Zelda games and bringing those elements to life in this new and colorful universe.

Overall, I think this game will be great once it is completely finished. Looking forward to playing more in the near future.. If you like games that's fast pace vehicle killing games with capture points then I recommend this game :). Fun game for about 5 hours then it's really repetitive. After the first upgrade the challenge went away. You can work the resources as you travel buying low where you are at and selling high where you are traveling so credits become pointless after a while. I think this game should be \$4.99 or less just due to the replay value being very low.. Get it on sale.. Awesome game concept/potential. It had lots of interesting mechanics/dynamics, and a beautiful soundtrack etc. But then the developer disappeared for over a year, then returned with a single patch and released the (unfinished) game. Very disappointing, as this game could have, in my opinion reached impressive heights. It's games like this that have made me quite hesitant of placing my faith in independent developers and purchasing their alpha games. I've seen several other games (like this one) grab the money, release an undeveloped/premature game, and take a hike. Shameful.
